Stemhat

Installation Guide

Divyessh Sivakumar (101227402)

**Date: 17/1/2025**

Step 1: Download the Script

Copy the install command for the Cytron Stemhat Scratch3 from the following GitHub:
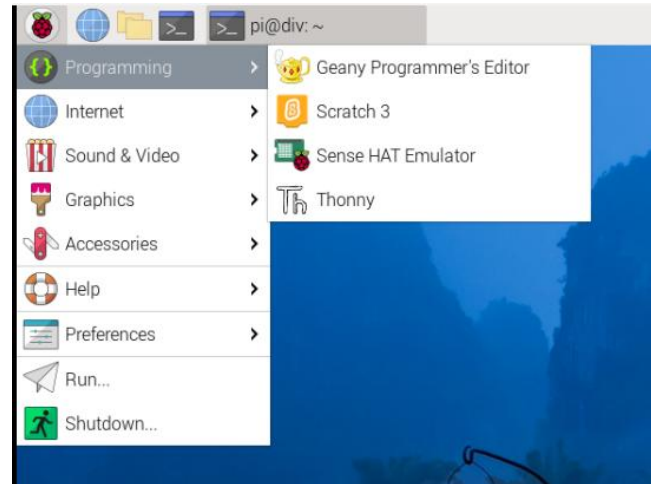

- [GitHub Repository](#)

Step 2: Install the Program

Copy and Run the install command in a terminal.

Step 3: Launch Scratch

Open the Scratch application on your device.

Step 4: Load the Extensions

Add the required extensions to Scratch to enable the Stemhat blocks.

Step 5: Access Stemhat Blocks

Once the extensions are loaded, the **Stemhat blocks** will be available within the Scratch interface.

Step 6: Refer to the Documentation

For detailed information about the Stemhat blocks, refer to the official documentation:

- [Stemhat Block Documentation](#)

Step 7: Download Sample Projects

You can download sample projects to get started from the following link:

- [Sample Projects](#)

If you encounter any issues or have questions, consult the documentation or reach out to the GitHub repository's contributors for support.
